Greetings Parents and Students,

Congratulations on being recommended to join our newly formed Satellite Online Campus which will be located at your home school during the 2019-2020 school year. We are extremely excited that you will have an opportunity to earn your high school diploma in the online environment. Digital/Virtual Learning is widely becoming the preferred method for earning a high school diploma and college degree for many students across the country. School districts in Georgia are following this trend as well which includes Clayton County Public Schools.

The Perry Career Academy is the primary online school in our school district. Over the past three years, the PCA has graduated over 700 students. This accomplishment has been recognized by the State and by the National Dropout Prevention Organization. The PCA is designed for accelerated students who desire to graduate early or for students who have fallen behind in their high school credits. Regardless of your situation, you can still earn your high school diploma in a timely fashion. This can be done through the expansion of our online learning through our Satellite locations at your home school. This is an excellent opportunity for you to have a flexible schedule which provides 24/7 access to your courses. Each of you should feel privileged that your school has recommended you for this program.

The satellite locations will be a part of the PCA. Students who attend our Satellite Campuses will be students of the PCA. The certified teacher in the lab will also be a teacher from the PCA. The Satellite Campus will enroll only 60 students and you can be one of them. Students will attend their home school for part of the day to complete their online course work. This offers flexibility and it works as the graduation numbers indicate above. Needless to say, you should feel honored that you have been selected to be a part of this innovative strategy to educate students. There will be a scheduled parent orientation on May 13th or May 14th at your home school. You will receive more information soon. We look forward to you participating in the PCA Satellite Campus location.

Thank you.

Dr. Terry Young
Executive Director

"In Pursuit of Excellence"

The mission of the Perry Center is to create opportunities for learning and establish partnerships in a safe supportive environment that promotes life-long learning.
